CRUM. MALICIOUSNESS .- Some person at present | very badly last, and with an ax or batchet, nearly chopped off a foreleg of a horse tied there. The animal was shot to put it out of pain. It is a pity that the misereant capable of such an act cannot be discovered, and brought to condign punishment.

Home Adam -- Among the passengers by the Opphrenes from San Francisco, were quite a number of our fellow-townsmen who have been making brief trips to the continent. Among others, we were pleased to welcome His Honor Mr. Justice Judd and family, who has been spending a vacation in New York; and the Hon. S. G. Wilder, who, during a hurried trip to the coast has been gathering facts and figures respecting steamship building, which will probably be made known at

the right time. A New Ice Factory .- Mr. R. Rycroft, who has recently visited the coast for the purpose of procuring fixtures, &c., is intending shortly to erect a new establishment for the manufactre of ice, to be run by water power, instead of steam. The present manufactory on the Esplanade has been unfortunate through accidents in failing to keep up a continuous supply of the luxury, and when we shall have two freezing establishments in operation our chances of keeping cool all the time ought to be better, and at cheaper rates.

CALIFORNIA PRODUCTS IN NEW ZEALAND. - It is as much a reflection upon our farmers as it is a novelty to see ticketed in the windows of city greengrocers, " Californian apples and onions, ex Mikado." They are certainly excellent samples, if that be any satisfaction, but why we should have to send to America for such articles of everyday consumption is a matter disapproving the tardiness of the Committee of beyond all comprehension. We are quite ready to do so, if corres. pondents will furnish the material with which to fill such a column, and we hope the author of the suggestion will himself make the beginning. It cannot be denied that a great deal of curious and ship, who was thanked by the head of the Governvaluable information has been frequently brought to light through the means of such a department in newspapers in other countries, which we have in memory's eye. Stanley, the discoverer of Dr. Livingstone, pro-

poses to reap new laurels in the African wilds. The English papers notice a new boat, built from his own designs, and intended to accompany his expedition to Central Africa, which has just been launched from the ship-yard of Mr. Messenger, of Teddington, where she was built. She is forty feet from stem to stern, and has a beam of six feet. The depth amidships is two feet six inches. She is provided with a double bank of feurteen oars, seven on each side. Built of cedar, with mahogany bulk heads, she can be divided into five sections, weighing 120 pounds each. The sections are furnished with poles, and can be carried after the fashion of an Indian palanquin, two men shouldering a section. The boat will carry about fifty persons. Her tonnage is between six and seven tons, and she draws one foot of water when fully loaded. The boat has been called The Livingstone, and a short trial trip was very satisfac-
